Creative technologist, 3D animator, and designer working under the name V01D R4ST3R. My work explores the aesthetics of early computing (low-poly 3D, pixel grids, command lines, CRT glow) and uses them to build story-driven, interactive experiences: games played live at performances, walls the public paints from their phones, music videos, typefaces, and posters for Winnipeg's music community. The practice draws on a Ph.D. in engineering and a B.A. in mathematics and philosophy, so the code, hardware, and 3D pipelines behind each piece are built by me.

Exhibitions, Installations & Public Projects

2026 **Big Sun Wall**, Big Sun festival, Winnipeg, MB.
Artist & Developer
A crowd-sourced digital graffiti wall. Festival-goers scanned a QR code on posters around the venue, painted a tag in a retro "Paint"-style app on their phone, and watched it ignite in neon on a projection above the bar about two and a half storeys tall (roughly 7.5 m × 13 m). I designed and coded the full system (phone painting app, real-time server, moderation queue, and the wall itself) and ran it live on the night.

2026 **IMABOX**, with painter Bîstyek. Market Square, Nuit Blanche Winnipeg 2026 (central exhibit).
3D Artist, Rigger & AR Developer
Bîstyek's paintings of displacement and resilience, brought into augmented reality: viewers scan a QR code and the work appears in their space on any Android or iOS phone, with no app required. I modelled the figures from his paintings, rigged and weight-painted them, cleaned up the animation (animated by another collaborator), rendered material for a promotional video, and built the web-AR experience. An ongoing collaboration with an artist featured at the Winnipeg Art Gallery (WAG).

2026 **Hocketus**, Savant Flaneur album release, Winnipeg, MB.
Projection Systems Developer
For the avant-garde chamber collective's release show, where rotating pairs of guest musicians played through the album's MaxMSP patches that force players to interrupt and cooperate. Instead of a conventional visualizer, my live system reads both players' audio and draws their *relationship*: who takes ground, who ducks, how fast the floor changes hands, and who gets cut off. Amber and cyan territories meet at a shifting membrane, and white light appears only when the two players sound together. Track changes cued over OSC/MIDI shift the palette for each piece. Python, NumPy, Pygame.

2025 **Glitch Lich Revolution**, Urban Shaman Gallery, Winnipeg, MB. *HYPER ART, Nuit Blanche Winnipeg 2025.*
Sole Software Developer
A live breakcore performance built around a *Dance Dance Revolution*-inspired game: four players on dance pads battle on a massive on-stage screen during DEAFWIZRD's set. In the game's anti-colonial lore, Two-Spirit defenders, keepers of ancestral languages, songs, and dances, storm the forts of an undead cyborg Queen Victoria. All software in Unity (C#), with 3D assets modelled in Blender. *With Phoenix Hourie (artwork), Carter Lowe / DEAFWIZRD (music); curated by Justin Bear L'Arrivee.*

Music Videos & Animation

2026 **Tired Cossack – "Cab"** (from the album *ZIMA*).
Director & 3D Animator
Full-length official music video for the Winnipeg band, set in a forest; every scene modelled and animated in Blender. Released August 2026; 79,000 views on YouTube by October 2026.

2026 **Nadarak – "Fixie"**.
3D Animator
Music video for the British Columbia artist, styled as a 1990s PlayStation-era racing game.

2026 **Radagast** – three animations.
3D Animator
Three collaborative animations set to original music by the international dungeon-synth composer.

2025–Pres **"Winnipeg Haunts"** (animation series).
3D Animator
An ongoing series of low-poly, PlayStation-style animations of beloved Winnipeg spots, all modelled, textured, and rendered in Blender.

- **Park Alley**: a 90s/00s bowling animation punning on the 1919 General "STRIKE!"
- **Hoagie Boys**: the storefront turns into a hoagie.
- **Eye and Ear Control Records**: a visualizer and instructional "walkthrough" of how to enter the store.
- **Public Domain**: a moody, detailed study of the venue's facade.

2025 **Public Domain "PBS" events**.
3D Animator
Looping GameCube-style animation for the venue's recurring event series.

2025 **Fantasy Club Books**.
3D Animator
Brought an original character by local artist Basement Lagoon (Austin Boulton) to life as an animated low-poly 3D model.

2024–Pres **MOYAMOYA visualizers**.
Animator & Sound Designer
Visualizers for the band's single releases, and 3D animations with original sound design and voice-over monologues used as a core part of the live show.

Games, Interactive Art & Creative Code

2026–Pres **German folklore video game**, with Radagast.
3D Artist, Programmer & Game Designer
A stylized first-person adventure built from real imagery of German landscapes and folk culture, with music and story by Radagast. Puzzles and decision-based storytelling rather than combat.

2025 **luanamoth.com** – Luana Moth alternate reality game.
Sole Developer & Game Designer
A narrative ARG for the musician, including an "in-universe" browser game (*Project Quassia: Invitation*) built in Phaser.js with 2D pixel art and lore puzzles.

2025 **georgedyck.com** – "GeorgeOS."
Artist & Developer
A portfolio as artwork: a fully working Windows 95-style desktop with a Start menu, movable windows, and hidden puzzles that guide visitors through the work non-linearly.

2025 **Where I Cannot Find Him**.
Artist & Developer
A creative-code piece in which the text itself is the medium: an interactive exegesis on the Book of Job, after a Žižekian reading of suffering.

2024 **moyamoya.ca** – MOYAMOYA ARG.
Artist & Developer
A "possessed computer" escape-room game: visitors explore a command-line interface to uncover puzzles, lore, and band content.

Type Design

2025–26 **Custom typefaces**, commissioned by **Loewen Guitars** (luthier) and **Dorothy Wolfe** (fashion designer).
Type Designer
Complete display typefaces translated from historical needlework patterns: an ornamental, scroll-filled alphabet for Loewen Guitars and a blackletter alphabet for Dorothy Wolfe. The work treats old stitch charts as an early form of pixel art, carrying a hand-craft grid tradition into digital type.

Poster, Identity & Merchandise Design

Selected gig posters (3D-rendered, printed and posted around Winnipeg)

2026 **Holy Void, Par Asito, Nex, Strawberry Punch**, West End Cultural Centre, Oct 30.

2026 **dr.ift**, Sidestage, May 15.

2026 **MOYAMOYA, Kandekt**, Public Domain, March 21.

2026 **Radagast, Desolation Plains, Mutable Body**, Public Domain, Jan 17. Presented by Eye and Ear Control Records and Send & Receive; a wireframe knight "summoned from the command line" (Blender, Photoshop).

2026 **At Last, Detective!, dr.ift, Laughing Court**, The Handsome Daughter.

2026 **Bike, Walk, Run or Roll-a-thon**, community fundraiser graphics.

2025 **MOYAMOYA, Luana Moth, Justin Bear, DEAFWIZRD**, Public Domain, June 20 (also curated and promoted; see below).

Logos and identity

2026 **Glitch Witch** (DJ) – logo.

2025 **Hardcore Painting** (painting company) – logo.

2024–Pres **MOYAMOYA** – single and release artwork and visual identity.

Merchandise

2024–Pres **MOYAMOYA merchandise**. Designed all band merchandise, including shirts and long-sleeves; two sold-out print runs.

2025 **VOID INTERFACE [MODEL: OwB-mk1] Operations Manual**. A 10-page zine and "technical manual" for a 3-voice synth that fans could use to play along with the band's set, expanding the lore of V01D R4ST3R and MOYAMOYA.

Music, Curation & Event Production

Ongoing **Composer, Producer & Multi-instrumentalist**. Write classically inspired music and produce jungle, breakcore, and drum and bass in Ableton Live and Reaper, with several recording projects on the go. Play classical guitar, guitar, and bass. Studying composition, with a focus on counterpoint and music for video games.

2024–Pres **MOYAMOYA**, Winnipeg.
Bassist, Co-songwriter, Art Director & Manager
Co-write the band's music as part of a collaborative writing process, compose the interludes in our set, and recorded and produced one of our songs. Perform with the band and run much of its creative and business side: organize and promote our shows, book lineups, design and put up posters, and sell tickets; create all album art, visualizers, live animations, and merchandise; and manage merch sales and the band's bank account.

2025–Pres **Curated show**, Public Domain, Winnipeg (June 20, March 21).
Curator, Promoter & Designer

Organized and promoted a live bill with MOYAMOYA, Luana Moth, Justin Bear, and DEAFWIZRD in 2025, and with MOYAMOYA, KANDEKT, and Beth in 2026. Including all print and digital promotion.

Community Projects

2026 **Bike, Walk, Run or Roll-a-thon** (volunteer).
Designer & Full-Stack Developer
Volunteered to build the full online system, front and back end, and graphics for a fundraiser sending a friend to Spain for emergency surgery: participant sign-up, pledges and donations, live tracking of totals, and automated emails to supporters. Dozens of participants raised tens of thousands of dollars.

Teaching

2025–Pres **Course Developer & Instructor**, University of Winnipeg.
Physical Computing (electronics & Arduino); Applied Robotics with ROS 2 workshop
Designed and teach an original course in which students build their own hardware, from circuits to programmed autonomous vehicles.

2023–Pres **Instructor**, Canadian Mennonite University.
Calculus I & II; Ordinary Differential Equations

2026–Pres **Postdoctoral Fellow**, Applied Computer Science, University of Winnipeg.

Education

2025 **Ph.D., Biosystems Engineering**, University of Manitoba, Winnipeg, MB.

2020 **B.Sc., Biosystems Engineering**, University of Manitoba, Winnipeg, MB.

2013 **B.A., Mathematics (Minor in Philosophy)**, Canadian Mennonite University, Winnipeg, MB.

Selected Grants & Awards

2020–24 **Mitacs Accelerate** research funding (with AGCO).

2021–24 **University of Manitoba Graduate Fellowship**.

2020 **CSBE Undergraduate Thesis Award** (national).

2019 **3rd Place**, International Autonomous Agricultural Robotics Challenge, Purdue University.

2019 **CSBE Undergraduate Design Award** (national).

Tools & Skills

3D & motion: Blender (modelling, texturing, rigging, shaders, animation), Adobe After Effects

Design & type: Photoshop, poster and identity design, type design (FontStruction)

Games & interactive: Unity (C#), Phaser.js, JavaScript, HTML5/CSS, Node.js, real-time WebSockets, web AR

Music & audio: Ableton Live, Reaper, recording and production; classical guitar, guitar, bass

Live & hardware: OSC/MIDI projection systems, analog circuits (op-amps, CMOS, 555 timers), Arduino (C/C++)
